Dynamatic Manufacturing Limited
CIN:U27310KA2007PLC102763
Notes to the financial statements for the year ended 31 March 2026
All amounts are in INR lakhs unless otherwise stated

1 Reporting entity

The Company was into the business of manufacturing of iron castings (foundry business) and same has been discontinued last financial year. As a part of new vision and mission, the Company diversified its business operations into manufacturing activities viz. sheet metal operations, heat treatment, surface treatment, metal forming, metal coating alongside other ancillary operations, consequently the Company has changed its name from "JKM Ferrotech Limited" to "Dynamatic Manufacturing Limited" with effective from 11 April 2022.

During the year ended 31 March 2026, the Company has received a support letter committing technical and financial support from Dynamatic Technologies Limited (Parent entity). Pursuant to the above, these financial statements have been prepared on a going concern basis.

2 Material accounting policies

A Statement of compliance

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) specified under Section 133 of the Companies Act 2013 ('the Act') read with Companies (Indian Accounting Standard) Rules, 2015 (as amended from time to time) and other relevant provisions of the Act.

Accounting policies have been consistently applied except where a newly issued Indian Accounting Standard is initially adopted or a revision to an existing Indian Accounting Standard requires a change in the accounting policy hitherto in use.

B Functional and presentation currency

The financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest lakhs, unless otherwise mentioned.

C Basis of Preparation

The financial statements have been prepared on the historical cost convention and on an accrual basis of accounting, except for the following assets and liabilities which have been accounted as follows:

(i) Defined benefit and other long-term employee benefits where plan asset is measured at fair value less present value of defined benefit obligations.
(ii) Certain financial assets and liabilities that are qualified to be measured at fair value;

D Use of estimate, assumption and judgements

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosure of contingent liabilities and assets on the date of the financial statements and the reported amount of revenue and expenses for the year. Accounting estimates could change from year to year. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the year in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

Assumptions and estimation uncertainties

The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed in the following notes:

(i) Useful life of property, plant and equipment and intangible assets:

The useful life of the assets are determined in accordance with Schedule II of the Companies Act, 2013. In cases, where the useful life is different from that or is not prescribed in Schedule II, it is based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance.

(ii) Income taxes:

In assessing the realisability of deferred tax assets, the Management considers whether some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the years in which the temporary differences become deductible. The Management considers the scheduled reversals of deferred income tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred income tax assets are deductible, the Management believes that the Company will realize the benefits of those deductible differences. The amount of the deferred tax assets considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry forward period are reduced.

(iii) Provisions and contingencies:

The recognition and measurement of other provisions are based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the reporting date. The actual outflow of resources at a future date may therefore vary from the figure estimated at end of each reporting year.

(iv) Post-retirement benefit plans:

The obligation arising from the defined benefit plan is determined on the basis of actuarial assumptions which include discount rate, trends in salary escalation and vested future benefits and life expectancy. The discount rate is determined with reference to market yields at each financial year end on the government bonds.

(v) Impairment

The impairment provisions for financial assets are based on assumptions about risk of default and expected cash loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting year.

(vi) Fair value

Management uses valuation techniques in measuring the fair value of financial instruments where active market quotes are not available. In applying the valuation techniques, management makes maximum use of market inputs and uses estimates and assumptions that are, as far as possible, consistent with observable data that market participants would use in pricing the instrument. Where applicable data is not observable, management uses its best estimate about the assumptions that market participants would make. These estimates may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date.

E Measurement of fair values

Certain accounting policies and disclosures of the Company requires use of valuation techniques in measuring the fair value of some of the company's financial assets and liabilities where active market quotes are not available. In applying the valuation techniques, management makes maximum use of market inputs and uses estimates and assumptions that are, as far as possible, consistent with observable data that market participants would use in pricing the instrument. Where applicable data is not observable, management uses its best estimate about the assumptions that market participants would make. These estimates may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date. The measurement of fair values, for both financial and non financial assets and liabilities.

The Company has an established control framework with respect to the measurement of fair values. The valuation team regularly reviews significant unobservable inputs and valuation adjustments.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

F Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation (which includes capitalised borrowing costs, if any) and accumulated impairment losses, if any.

Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable costs of bringing an asset to working condition for its intended use and estimated cost of dismantling and removing the item and restoring the site on which it is located. Costs directly attributable to acquisition are capitalised until the property, plant and equipment are ready for use, as intended by Management.

The cost of a self-constructed item of property, plant and equipment comprises the cost of materials, direct labour and any other costs directly attributable to bringing the item to its intended working condition and estimated costs of dismantling, removing and restoring the site on which it is located, wherever applicable.

(ii) Subsequent costs

Subsequent cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item, if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The costs of repairs and maintenance are recognised in the statement of profit and loss as incurred.

(iii) Derecognition of property, plant and equipment

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the property, plant and equipment and is recognised in the statement of profit and loss as gain/loss.

(iv) Depreciation methods, estimated useful lives and residual value

Depreciation is provided on a Straight Line Method ('SLM') over estimated useful life of the property, plant and equipment less their estimated residual value as defined by the Management. Depreciation for assets purchased / sold during the year is proportionately charged. If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

The range of estimated useful lives of items of property, plant and equipment are as follows:

Category of assets	**Useful life estimated by management**
Measuring instruments*	10 years, 13 years and 21 years for 3 shifts, 2 shifts and 1 shift respectively
Furniture and fixtures	5 years
Office equipment	5 years
Data processing equipment	4 years
Tools, dies and moulds	9 years
Plant and machinery*	10 years, 13 years and 21 years for 3 shifts, 2 shifts and 1 shift respectively
Electrical installation*	10 years, 13 years and 21 years for 3 shifts, 2 shifts and 1 shift respectively
Leasehold improvements	Over the period of lease tenure

* The Management believes that the useful lives as given above best represent the period over which management expects to use these assets based on an internal assessment and technical evaluation where necessary. Hence, the useful lives for these assets is different from the useful lives as prescribed under Part C of Schedule II of the Companies Act, 2013.

The estimated useful lives, residual values and depreciation method are reviewed at each financial year, with the effect of any changes in estimate accounted for on a prospective basis.

G Intangible assets

(i) Acquired intangible assets

Intangible assets that are acquired by the Company, which have finite useful lives, are measured at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on straight-line basis over the estimated useful lives of intangible assets. The estimated useful life and amortisation method are reviewed at each financial year end, with the effect of any changes in estimate being accounted for on a prospective basis. Cost includes any directly attributable incidental expenses necessary to make the intangible assets ready for use.

(ii) Internally generated intangible assets

Expenditure on research activities, undertaken with the prospect of gaining new scientific or technical knowledge and understanding, is recognised in statement of profit and loss as incurred.

An internally -generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in the statement of profit and loss in the financial year in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

(iii) Subsequent measurement

Subsequent costs are capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditures, including expenditure on internally-generated intangibles, are recognised in the statement of profit and loss as incurred.

(iv) Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal of such intangible assets. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the intangible asset are recognised in the statement of profit and loss.

(v) Amortisation

The Company amortises intangible assets with a finite useful life using the straight-line method.

The estimated useful lives of intangibles are as follows:

Category of asset	**Useful life**
Application Software	4 years
Other Intangible assets	10 years

The useful lives of intangible assets are reviewed, and adjusted if appropriate, at the end of each reporting year.

H Impairment

(i) Financial assets

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss. The Company follows 'simplified approach' for recognition of impairment loss on trade receivables. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If in subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on 12 month ECL.

(ii) Non-financial assets

Intangible assets and property, plant and equipment

Intangible assets and property, plant and equipment are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the CGU to which the asset belongs.

If such assets are considered to be impaired, the impairment to be recognised in the statement of profit and loss is measured by the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the statement of profit and loss if there has been a change in the estimates used to determine the recoverable amount.

The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortisation or depreciation) had no impairment loss been recognised for the asset in prior years.

I Leases

(i) The Company as a lessee:

The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:
(i) the contract involves the use of an identified asset,
(ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease, and
(iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes Right-of use asset (“ROU”) and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short- term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.
Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term.

ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised. The ROU assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses. ROU assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related ROU asset if the Company changes its assessment of whether it will exercise an extension or a termination option.
Lease liability and ROU assets have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

(ii) Short-term leases and leases of low-value assets:
The Company has elected not to recognise right-of use assets and lease liabilities for leases of low value assets and short-term leases. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

J Inventories
Inventories are valued at the lower of cost and net realisable value. Cost of inventories comprises purchase price, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. In determining the cost, weighted average cost is used. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs to sell. The comparison of cost and net realisable value is made on an item-by-item basis.

Inventories are stated net of write down or allowances on account of obsolescence, damage or slow moving items.

The method of determination of cost is as follows:
- Raw materials, components and stores and spares – on a weighted average basis
- Work-in-progress – includes costs of conversion
- Finished goods – At material cost, conversion costs and an appropriate share of production overheads, wherever applicable.

The net realisable value of work-in-progress is determined with reference to the net realisable value of related finished goods. Raw materials and other supplies held for use in production of inventories are not written down below cost except in cases where material prices have declined, and it is estimated that the cost of the finished products will exceed their net realisable value. Fixed production overheads are allocated on the basis of normal capacity of production facilities. The provision for inventory obsolescence is assessed periodically and is provided as considered necessary.

K Revenue recognition

Revenue is recognised upon transfer of control of promised goods or services to customers and is measured based on the consideration to which the Company expects to be entitled to in a contract with a customer and excludes trade discounts, volume rebates and amounts collected on behalf of government The Company derives its revenue from sale of products. For certain contracts that permit the customer to return an item, revenue is recognised to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognised will not occur and is reassessed at the end of each reporting period.

Where the Company's contracts with customers include promise to transfer multiple goods and services to a customer, the Company assesses the goods/services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligations is made to determine the deliverables and the ability of the customer to benefit independently from such deliverables.

The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such goods, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc. to determine whether the performance obligation is satisfied at a point in time or over a period of time.

Export benefits are recognized in the statement of profit and loss account when the right to receive credit as per the terms of the entitlement is established in respect of exports made.

Service income including management fees is measured based on transaction price and is recognized when an unconditional right to receive such income is established and on the performance of services.

Contract assets are recognised when there is excess of revenue earned over billings on contracts. Contract assets are classified as unbilled receivables (only act of invoicing is pending) when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms. Unearned revenue ("contract liability") is recognised when there are billings in excess of revenue.

L Other income

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR), which is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. Interest income is included in other income in the statement of profit and loss.

Dividend income is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

M Financial Instruments

Financial assets

(i) Recognition and initial measurement

Trade receivables and debt securities are initially recognised when they are originated. All other financial assets and liabilities are initially recognised when the Company becomes a party to contractual provisions of the instrument.

A financial asset or liability is initially measured at fair value plus, for an item not at fair value through profit and loss (FVTPL), transaction cost that are directly attributable to its acquisition or issue.

(ii) Classification and subsequent measurement

i) Financial assets

On initial recognition, a financial instrument is classified and measured at
- amortised cost
- fair value through other comprehensive income (FVOCI) - debt instruments;
- fair value through other comprehensive income (FVOCI) - equity investments; or
- fair value through profit and loss (FVTPL)

Financial assets are not classified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

A financial asset is measured at amortised cost if it meets both the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial assets give rise on a specified date to cash flows that are solely payments of principal and interest on the principal amounts outstanding.

A debt investment is measured at FVTOCI if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flow and selling financial assets; and
- the contractual terms of the financial assets give rise on a specified date to cash flows that are solely payments of principal and interest on the principal amounts outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI (designated as FVOCI- equity investment). This election is made on an investment-to-investment basis.

All financial assets not classified as amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL, if doing so eliminates or significantly reduces an accounting mistake that would otherwise arise.

Financial assets: Subsequent measurement and gains and losses

Financial assets, at FVTPL:

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income are recognised in profit or loss.

Financial assets at amortised cost:

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Debt investments at FVTOCI:

These assets are subsequently measured at fair value. Interest income under effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

Equity investments at FVTOCI:

These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to profit or loss.

3) Impairment of financial assets

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss. The Company follows ' simplified approach' for recognition of impairment loss on trade receivables. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from initial recognition.

For recognition of impairment loss on financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If in subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12 month ECL.

Derecognition of financial assets

A financial asset is derecognised only when:

- the Company has transferred the rights to receive cash flows from financial asset or
- retains the contractual rights to receive the cash flows from financial asset but assumed a contractual obligation to pay the cash flows to one or more recipients.

Where the Company has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognised. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognised.

Where the Company has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

Financial liability

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss or amortised cost.

All financial liabilities are recognised initially at fair value and, in case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separate embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognised in OCI. These gains/ losses are not subsequently transferred to statement of profit and loss. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit or loss.

Amortised cost

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the Effective Interest Rate ("EIR") method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

Offsetting

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

N Employee benefits

(i) Defined benefit plans

The Company's gratuity plan is a defined benefit plan. The present value of gratuity obligation under such defined benefit plans is determined based on actuarial valuations carried out by an independent actuary using the Projected Unit Credit Method, which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measure each unit separately to build up the final obligation. The obligation is measured at the present value of estimated future cash flows. The discount rates used for determining the present value of obligation under defined benefit plans, is based on the market yields on Government securities as at the balance sheet date, having maturity periods approximating to the terms of related obligations.

Actuarial gains or losses are recognised in other comprehensive income. Further, the profit or loss does not include an expected return on plan assets. Instead net interest recognised in profit or loss is calculated by applying the discount rate used to measure the defined benefit obligation to the net defined benefit liability or asset. The actual return on plan assets above or below the discount rate is recognised as part of remeasurement of net defined liability or asset through other comprehensive income.

Remeasurements comprising actuarial gains or losses and return on plan assets (excluding amounts included in net interest on the net defined benefit liability) are not reclassified to profit or loss in subsequent periods.

The Company's gratuity scheme is administered through Life Insurance Corporation of India and the provision for the same is determined on the basis of actuarial valuation carried out by an independent actuary. Provision is made for the shortfall, if any, between the amounts required to be contributed to meet the accrued liability for gratuity as determined by actuarial valuation and the available corpus of the funds.

(ii) Short term employee benefits

All employee benefits falling due wholly within twelve months of rendering the services are classified as short-term employee benefits, which include benefits like salaries, wages, short-term compensated absences and performance incentives and are recognised as expenses in the period in which the employee renders the related service.

Short term employee benefits are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid e.g. short term cash bonus, if the Company has a present legal or constructive obligation to pay this amount as a result of past services provided by the employee and the amount of obligation can be estimated reliably.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service ('past service cost' or 'past service gain') or the gain or loss on curtailment is recognised immediately in profit or loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

(iii) Compensated absences

The employees of the Company are entitled to compensated absence. The employees can carry-forward a portion of the unutilised accumulating compensated absence and utilise it in future periods. The Company records an obligation for compensated absences in the period in which the employee renders the services that increases this entitlement. The obligation is measured on the basis of an independent actuarial valuation using the Projected Unit method as at the reporting date. Actuarial gains / losses are immediately taken to the statement of profit and loss and Other comprehensive income.

(iv) Defined contribution plan

A defined contribution plan is a post-employment benefit plan under which an entity pays specified contributions to a separate entity and has no obligation to pay any further amounts. The Company makes specified monthly contributions towards employee Provident Fund to Government administered Provident Fund Scheme which is a defined contribution plan. The Company's contribution is recognised as an expense in the statement of profit and loss during the period in which the employee renders the related service.

(v) Termination benefits

Termination benefits are expensed at the earlier of when the Company can no longer withdraw the offer of those benefits and when the Company recognises cost of restructuring. If the benefits are not expected to be settled wholly within 12 months of reporting date, then they are discounted.

O Foreign currency transactions and balances

Foreign currency are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign currency denominated monetary assets and liabilities are translated into relevant functional currency at exchange rates in effect at the reporting date.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are recognised in profit or loss.

Non-monetary assets and non-monetary liabilities denominated in foreign currency and measured at fair value are translated at the exchange rate prevalent at the date when the fair value was determined. Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss and are generally recognised in profit and loss, except exchange differences arising from the translation of the following items which are recognised in OCI:

- equity investments at fair value through OCI (FVOCI)
- a financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective; and
- qualifying cash flow hedges to the extent that the hedges are effective.

P Taxes

Income tax expense comprises current and deferred income tax. Income tax expense is recognised in the statement of profit and loss except to the extent it relates to items recognised directly in equity, in which case it is recognised in other comprehensive income.

Current income tax for current and prior periods is recognised at the amount expected to be paid or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the reporting date. Deferred income tax assets and liabilities are recognised for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements except for the cases mentioned below:

Deferred income tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantively by the balance sheet date and are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of changes in tax rates on deferred income tax assets and liabilities is recognised as income or expense in the period that includes the enactment or substantive enactment date.

Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets and liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profits or loss at the time of the transaction;
- temporary investments related to investment in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary difference arising on the initial recognition of goodwill.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profits will be available against which such deferred tax can be realised. Deferred tax assets, unrecognised or recognised, are reviewed at each reporting date and are recognised / reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

The Company offsets, the current tax assets and liabilities (on a year on year basis) and deferred tax assets and liabilities, where it has a legally enforceable right and where it intends to settle such assets and liabilities on a net basis.

Q Provisions (other than employee benefits)

(i) General

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, the expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

(ii) Onerous contract

Provision for onerous contracts. i.e. contracts where the expected unavoidable cost of meeting the obligations under the contract exceed the economic benefits expected to be received under it, are recognised when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event based on a reliable estimate of such obligation.

R Contingent Liability

A disclosure for contingent liabilities is made where there is a possible obligation or a present obligation that may probably not require an outflow of resources. When there is a possible or a present obligation where the likelihood of outflow of resources is remote, no provision or disclosure is made.

S Cash and cash equivalents

Cash and cash equivalent includes cash on hand, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts.

T Cash flow statement

Cash flows are reported using the indirect method, whereby net profit before taxes for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

U Earnings per share

The basic earnings per share is computed by dividing the net profit attributable to the owners of the Company for the year by the weighted average number of equity shares outstanding during reporting year.

The number of shares used in computing diluted earnings per share comprises the weighted average shares considered for deriving basic earnings per share and also the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

Dilutive potential equity shares are deemed converted as of the beginning of the reporting date, unless they have been issued at a later date. In computing diluted earnings per share, only potential equity shares that is dilutive and which either reduces earnings per share or increase loss per share are included.

V Segment reporting

Based on the “management approach” as defined in Ind AS 108, Operating Segments, the Chief Operating Decision Maker evaluates the Company’s performance and allocates resources based on an analysis of various performance indicators by business segments.

W Warranties

Warranty costs are estimated by the Management on the basis of technical evaluation and past experience. Provision is made for estimated liability, if any, in respect of warranty costs in the period of sale of goods.

X Recent amendments

The Ministry of Corporate Affairs (“MCA”) notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On August 13, 2025, the MCA notified the Companies (Indian Accounting Standards) Amendment Rules, 2025. This notification has led to amendments in the following Ind AS, which are applicable to the Company from April 1, 2026.
The Company is currently evaluating the impact of these amendments on its financial statements.
Amended Ind AS:
Ind AS 1 – Presentation of Financial Statements
Ind AS 10 – Events After the Reporting Period

Dynamatic Manufacturing Limited

	4,032	**2,092**

8 Trade receivables

Particulars	As at 31 March 2026	As at 31 March 2025
Unsecured, considered good		
Trade receivable	4,163	2,149
Less: Allowance for credit loss	(610)	(610)
Total trade receivables	**3,553**	**1,539**

(i) All trade receivables are 'current'.

Trade receivables ageing schedule as at 31 March 2026:

Sr. No	Particulars		Outstanding for following periods from due date of payment					Total
		Not Due	Less than 6 months	6 months - 1 year	1-2 years	2-3 years	More than 3 years	
(i)	Undisputed trade receivables – considered good	2,062	1,462	35	2	-	602	4,163
	Less: Allowances for credit loss							(610)
	Net trade receivable							**3,553**

Trade receivables ageing schedule as at 31 March 2025:

Sr. No	Particulars		Outstanding for following periods from due date of payment					Total
		Not Due	Less than 6 months	6 months - 1 year	1-2 years	2-3 years	More than 3 years	
(i)	Undisputed trade receivables – considered good	773	757	2	-	-	617	2,149
	Less: Allowances for credit loss							**(610)**
	Net trade receivable							**1,539**

Note: There are no disputed trade receivables as at 31 March 2026 and 31 March 2025.
The Company's exposure to credit and currency risks, and loss allowances related to trade receivables are disclosed in note 39.

9 Cash and cash equivalents

Particulars	As at 31 March 2026	As at 31 March 2025
Cash on hand	1	-
Balance with banks		
- in current accounts	80	21
	81	**21**
Cash and cash equivalents as defined in Ind AS 7 "Statements of Cash Flows"	**81**	**21**

10 Bank balances other than cash and cash equivalents above

Particulars	As at 31 March 2026	As at 31 March 2025
In deposit accounts-held as margin money (due to mature within 12 months from the reporting date)*	65	61
	65	**61**

*Balances in margin money deposits represents deposits made for non-fund based limits with banks, which are available for use to settle a liability for not more than 12 months from the balance sheet date.

11 Current loans

Particulars	As at 31 March 2026	As at 31 March 2025
Unsecured, considered good		
Loans to employees	38	22
	38	**22**

12 Other current assets

Particulars	As at 31 March 2026	As at 31 March 2025
Unsecured, considered good		
Advances for supply of goods and Service	314	185
Provision for advances for supply of goods and service	(52)	(52)
	262	**133**
Prepaid expense	99	21
Balances with government authorities	1,691	842
Provision for balance with government authorities	(6)	(6)
	1,685	**836**
	2,046	**990**

13 Equity share capital

Particulars	As at 31 March 2026	As at 31 March 2025
Authorised share capital:		
Equity shares		
180,000,000 (31 March 2025: 180,000,000) equity shares of par value of INR 10 each	18,000	18,000
	18,000	**18,000**
Issued, subscribed and fully paid up:		
Equity shares		
3,75,00,000 (31 March 2025: 3,75,00,000) equity shares of par value of INR 10 each	3,750	3,750
	3,750	**3,750**

i) Reconciliation of equity shares outstanding at the beginning and at the end of the reporting year is as given below:

Particulars	For the year ended 31 March 2026		For the year ended 31 March 2025	
	Number of shares	Amount (INR in lakhs)	Number of shares	Amount (INR in lakhs)
Equity shares outstanding at the beginning of the year	3,75,00,000	3,750	3,75,00,000	3,750
Add: Issue of share capital during the year	-	-	-	-
Equity shares outstanding at the end of the year	**3,75,00,000**	**3,750**	**3,75,00,000**	**3,750**

ii) Rights, preferences and restrictions attached to equity shares:

The Company has a single class of equity shares. Accordingly, all equity shares rank equally with regard to dividends and share in the Company's residual assets. The equity shares are entitled to receive dividend as declared from time to time. The voting rights of an equity shareholder on a poll (not on show of hands) are in proportion to its share of the paid-up equity capital of the Company.

In the event of liquidation of the Company, the holders of equity shares will be entitled to receive any of the remaining asset of the Company after distribution of all preferential amounts, if any. The distribution will be in proportion to the number of equity shares held by the shareholders.

The Company has not allotted any fully paid equity shares by way of bonus shares nor has bought back any class of equity shares during the period of five years immediately preceding the balance sheet date nor has issued shares for consideration other than cash.

Gratuity and compensated absences	332	-
	332	**-**

On November 21, 2025, the Government of India formally notified the enforcement of four Labour Codes - the Code on Wages, 2019; the Industrial Relations Code, 2020; the Code on Social Security, 2020; and the Occupational Safety, Health and Working Conditions Code, 2020 - thereby consolidating 29 erstwhile labour legislations into a unified framework. The Ministry of Labour & Employment, in alignment with this legal mandate, issued draft Central Rules and Frequently Asked Questions (FAQs) to facilitate the assessment of financial consequences, underscoring both statutory and regulatory guidance for compliance.

The above Labour Laws introduced a revised definition of 'wages', which impacted the computation of gratuity and compensated absences. Pursuant to the new definition of wages, an incremental one-time non-cash cost of INR. 293 lakhs towards gratuity and INR 39 Lakhs towards compensated absences, predominantly relating to past service costs, has been debited to the Statement of Profit and Loss in order to comply with Ind AS 19 “Employee Benefits” and treated as an exceptional item in line with the accounting standards and clarifications issued by the Institute of Chartered Accountants of India (ICAI) regarding the accounting treatment for the above amendment in law.

31 Contingent liabilities

Particulars	As at 31 March 2026	As at 31 March 2025

34 Leases

(i) Following are the change in the carrying value of right to use of assets:

Particulars	Category of ROU assets	
	Land and building	Land and building
	31 March 2026	31 March 2025
Opening balance as at	495	577
Addition	-	-
Amortisation	(83)	(82)
Closing balance	**412**	**495**

The following is the break up of current & non-current lease liabilities:

Particulars	As at 31 March 2026	As at 31 March 2025
Non- current	424	496
Current	72	64
Total	**496**	**560**

(iii) The following is the movement of lease liabilities:

Particulars	As at 31 March 2026	As at 31 March 2025
Balance at the beginning of the year	560	608
Addition during the year	-	-
Finance cost during the year	61	67
Lease payment during the year	(125)	(115)
Total	**496**	**560**

(iv) The table below provides details regarding the contractual maturities of lease liabilities on an undiscounted basis:

Particulars	As at 31 March 2026	As at 31 March 2025
Payable within 1 year	125	125
Payable between 1-5 years	534	522
Payable later than 5 years	-	136
Total	**659**	**783**

The Company does not face a significant liquidity risk with regard to its lease liabilities as the current assets are sufficient to meet the obligations related to lease liabilities as and when they fall due.

Rental expense recorded for short-term leases was INR 1 lakhs for the year ended 31 March 2026 (31 March 2025: INR 1 lakhs).

35 Segment reporting

The Chief Executive Officer and Managing Director of the Company has been identified as the Chief Operating Decision Maker ('CODM') as defined by Ind AS 108, Operating Segments. The CODM evaluates the Company's performance and allocates resources based on an analysis of various performance indicators by the products portfolio and segment information has been presented accordingly.

Operating segment

The Company's business is concentrated in manufacturing of hydraulic products, and aerospace related items. Accordingly, primary segment information is presented based on the followings:

Reportable segment

Aerospace	Engaged in the activity of manufacturing airframe structures and precision aerospace components.
Hydraulics	Engaged in the activity of manufacturing hydraulic pumps.
Others	It consist of old business pertains to metallurgy.

Segment information is prepared in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole. Revenue identifiable to business segments have been disclosed under the respective business segment. Segment costs include employee benefit expenses, cost of material consumed, depreciation and other operating expenses that can be allocated on a reasonable basis to respective segments. Assets and liabilities in relation to segments are categorized based on items that are individually identifiable to that segment.

A Operating segment information is as follows:

Particulars	For the year ended 31 March 2026	For the year ended 31 March 2025

	1,238	**757**
Compensated absences:		
Non-current	212	109
Current	13	8
	225	**117**

The Company operates following post-employment defined benefit plan:

Defined benefit plan

The Company operates a post-employment defined benefit plan providing gratuity benefits in accordance with the applicable provisions of the Payment of Gratuity Act, 1972 and the provisions of the Code on Social Security, 2020, to the extent notified and applicable.

Employees rendering continuous service of five years or more are eligible for gratuity benefits. The gratuity benefit payable on resignation, retirement, death, disablement or termination is computed based on the last drawn salary and period of qualifying service, in accordance with the applicable statutory provisions.

Pursuant to the Code on Social Security, 2020, gratuity may become payable to employees on completion of one year of service in case of fixed-term employment contracts, as and when the relevant provisions are notified and become effective.

The gratuity plan is a funded defined benefit plan administered through an approved gratuity fund. The Company follows a funding policy based on actuarial valuation and expected future gratuity obligations and may not fully fund the entire defined benefit obligation at all times.

The defined benefit obligation exposes the Company to actuarial risks including salary escalation risk, interest rate risk, longevity risk and investment risk.

A Funding

The Company expects to pay INR 20 lakhs in contributions to its defined benefit plans

B Reconciliation of net defined benefit liability

The following table shows a reconciliation from the opening balances to the closing balances for the net defined benefit liability/

Notes:

(i) The discount rate is based on the prevailing market yield on Government Securities as at the balance sheet date for the estimated term

(ii) The expected return on plan assets is determined considering several applicable factors mainly the composition of the plan assets held, assessed risks of asset management, historical results of the return on plan assets and the Group's policy for plan asset management.

(iii) The estimate of future salary increases considered in actuarial valuation takes into account inflation, seniority, promotion and other relevant factors such as supply and demand in the employment market.

(ii) Sensitivity Analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant would have affected defined benefit obligation by amounts shown below:

Particulars	As at 31 March 2026	As at 31 March 2025
Projected Benefit Obligation (gross)	1,251	766
Impact of change in discount rate by +1%	(99)	(64)
Impact of change in discount rate by -1%	114	74
Impact of change in salary rate by +1%	80	71
Impact of change in salary rate by -1%	(87)	(64)
Impact of change in employee turnover rate by +1%	15	4
Impact of change in employee turnover rate by -1%	(17)	(5)

Defined contribution plan:

The Company's contribution to Provident Fund aggregating to INR 230 lakhs (31 March 2025: INR 183 lakhs) has been recognised in the Statement of Profit and Loss under the head employee benefit expense.

38 Financial instruments - fair value and risk management

Accounting classification and fair value

The following table shows the carrying amount and fair value of financial assets and financial liabilities including their levels in fair value hierarchy:

Fair value hierarchy:

The section explains the judgement and estimates made in determining the fair values of the financial instruments that are:

a) recognised and measured at fair value

b) measured at amortised cost and for which fair values are disclosed in the financial statements.

To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into the three levels prescribed under the Indian Accounting Standard.

Particulars	Carrying amount	Fair value			
	31 March 2026	Level 1	Level 2	Level 3	Total
Financial assets measured at amortised cost					
Trade receivables, net of loss allowance	3,553	-	-	-	-
Cash and cash equivalents	81	-	-	-	-
Bank balances other than cash and cash equivalents above*	68	-	-	-	-
Loan*	38	-	-	-	-
Other financial assets*	180	-	-	-	-
Financial assets measured at fair value					
Investments in equity shares	33	-	-	33	33
Total financial assets	**3,953**	**-**	**-**	**33**	**33**
Financial liabilities measured at amortised cost					
Trade payables	3,116	-	-	-	-
Lease liabilities*	496	-	-	-	-
Other financial liabilities*	382	-	-	-	-
Total financial liabilities	**3,994**	**-**	**-**	**-**	**-**

Particulars	Carrying amount	Fair value			
	31 March 2025	Level 1	Level 2	Level 3	Total
Financial assets measured at amortised cost					
Trade receivables, net of loss allowance	1,539	-	-	-	-
Cash and cash equivalents	21	-	-	-	-
Bank balances other than cash and cash equivalents above*	61	-	-	-	-
Loan*	22	-	-	-	-
Other financial assets*	173	-	-	-	
Financial assets measured at fair value					
Investments in equity shares	33	-	-	33	33
Total financial assets	**1,849**	**-**	**-**	**33**	**33**
Financial liabilities measured at amortised cost					
Trade payables	1,291	-	-	-	-
Lease liabilities*	560	-	-	-	-
Other financial liabilities*	344	-	-	-	-
Total financial liabilities	**2,195**	**-**	**-**	**-**	**-**

*Amount disclosed after considering non-current and current.

Fair value hierarchy

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes investment in equity, preference securities, mutual funds and debentures that have quoted price.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unquoted equity securities.

Fair Valuation Method

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

A Financial Assets:

i Fair value of all the above financial assets are measured at balance sheet date value, as most of them are settled within a short period and so their fair value are assumed to be almost equal to the balance sheet date value.

B Financial Liabilities:

i **Trade payables and other financial liabilities:** Fair values of trade payables and other financial liabilities are measured at balance sheet date value, as most of them are settled within a short period and so their fair values are assumed almost equal to the balance sheet date values.

39 Financial risk management

The Company has exposure to Credit, Liquidity and market risk arising from financial instruments:

Risk management framework

The Company's Board of Directors ('BoD') has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's BoD oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company.

(i) Credit risk

Credit risk is the risk of financial loss to the Company, if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers. Credit risk arises from cash held with banks, as well as credit exposure to clients, including outstanding accounts receivables. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. The Company assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors. The carrying amount of financial asset represent the maximum credit exposure.

Trade and other receivables

The maximum exposure to credit risk at the reporting date is primarily from trade receivables. However, the management also considers the factors that may influence the credit risk of its customer base. Customers of the Company are spread across diverse industries and geographical areas. The Company limits its exposure to credit risk from trade receivables by establishing a maximum credit period and takes appropriate measures to mitigate the risk of financial loss from defaults. Recurring credit evaluation of credit worthiness is performed based on the financial condition of respective customers.

Expected credit loss assessment for Trade Receivables as at 31 March 2026 and 31 March 2025 are as follows:

The Company establishes an allowance for credit loss that represents its estimate of expected losses in respect of trade and other receivables based on past and the recent collection trend. The maximum exposure to credit risk as at reporting date is primarily from trade receivables as at 31 March 2026 amounting to INR 3,553 lakhs (31 March 2025: 1,539 lakhs). The movement in allowance for credit loss in respect of trade and other receivables during the year was as follows:

Particulars	As at 31 March 2026	As at 31 March 2025
Balance as at beginning of the year	610	610
Net measurement of loss allowance	-	-
Balance as at end of the year	**610**	**610**

(ii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligation as they become due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Management monitors rolling forecast of the Company's liquidity position and cash and bank balances on the basis of expected cash flows. This is generally carried out by the Management of the Company in accordance with practice and limits set by the Company. In addition, the Company's liquidity management policy involves projecting cash flows and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

i) Financing arrangement

The Company maintains the following line of credit:

i) Term loan from bank aggregating to INR 2,166 (31 March 2025: INR 178) repayable in 20 quarterly instalments. First instalment starting from quarter following the month first disbursement of Term Loan and with interest rate at 8.00% - 8.75% per annum.
First hypothecation charge on all existing and future receivables / current assets / movable assets / movable fixed assets of the company. Dynamatic Technologies Limited (Parent entity) has provided the corporate guarantee on behalf of the Company towards loan availed.

ii) Term loan from bank aggregating to INR 984 (31 March 2025: Nil) repayable in 20 quarterly instalments. First instalment starting from quarter following the month first disbursement of Term Loan and with interest rate at 10.40% per annum.
The Facility is secured by :
a) Exclusive charge on machinery purchased from the Axis Finance facility.
b) Pari-passu charge on entire current assets of the company.
c) Dynamatic Technologies Limited (Parent entity) has provided the corporate guarantee on behalf of the Company towards loan availed.

iii) Cash credit, Packing credit facility and working capital demand loans from banks carry interest ranging between 8.25% - 9.00% per annum, computed on a monthly basis on the actual amount utilized, and are repayable on demand. The facility is secured by first hypothecation charge on all existing and future receivables / current assets / movable assets / movable fixed assets of the company. Dynamatic Technologies Limited (Parent entity) has provided the corporate guarantee on behalf of the Company towards loan availed.

The table below provides details regarding the contractual maturities of significant financial liabilities as at 31 March 2026 and 31 March 2025. The amounts are gross and undiscounted contractual cash flow and includes contractual interest payment and exclude netting arrangements:

As at 31 March 2026

Particulars	Contractual cash flows				
	Carrying amount	Total	0-1 years	1-5 years	5 years and above
Borrowings*	5,882	5,882	3,357	2,525	
Trade payables	3,116	3,116	3,116	-	-
Lease liabilities	496	659	125	534	-
Other financial liabilities*	382	382	382	-	-
	9,876	**10,039**	**6,980**	**3,059**	**-**

As at 31 March 2025

Particulars	Contractual cash flows				
	Carrying amount	Total	0-1 years	1-5 years	5 years and above
Borrowings*	1,444	1,444	1,306	138	-
Trade payables	1,291	1,291	1,291	-	-
Lease liabilities	560	783	125	522	136
Other financial liabilities*	344	344	344	-	-
	3,639	**3,862**	**3,066**	**660**	**136**

*Amount disclosed after considering non-current and current.

As disclosed in note 15 and 17, the Company has secured bank loan that contains loan covenants. A future breach of covenant may require the Company to repay the loan earlier than indicated in the above table. Except for these financial liabilities, it is not expected that cash flows included in maturity analysis could occur significantly earlier.

iii) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. Market risk is attributable to all market risk sensitive financial instruments including foreign currency receivables and payables and long term debt. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

a) Currency risk

The Company is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchases and expenses are denominated and the respective functional currency of the Company. The functional currency of the Company is INR. The currencies in which these transactions are primarily denominated are in USD, GBP and Euro.

Management monitors the movement in foreign currency and the Company's exposure in each of the foreign currency. Based on the analysis and study of movement in foreign currency, the Company decides to exchange its foreign currency.

Exposure to currency risk

The summary quantitative data about the Company's exposure to currency risk as reported to management is as follows:

Particulars	Currency	As at 31 March 2026		As at 31 March 2025	
		Amount in foreign currency in Lakhs	Amount in INR lakhs	Amount in foreign currency in Lakhs	Amount in INR lakhs
Trade receivable	USD	30	2,847	8	675
	GBP	0.1	7.9	0.1	12.9
	EURO	6	622	4	346
Trade payable	USD	9	848	4	357
	GBP	5	583	0.04	4
	EURO	2	207	5	434
Borrowing	USD	11	1,055	-	-

The following significant exchange rates have been applied :

Currency	Year end spot rate	
	31 March 2026	31 March 2025
USD/INR	94.35	85.51
GBP/INR	123.56	110.66
EURO/INR	108.16	92.61

Sensitivity analysis

A reasonably possible strengthening/(weakening) of the USD and GBP against INR at 31 March 2026 and 31 March 2025 would have affected the measurement of financial instruments denominated in foreign currency and affected equity and profit and loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant.

Particulars	Profit and loss		Equity, net of tax	
	Strengthening	Weakening	Strengthening	Weakening
31 March 2026				
USD (+5% movement)	47	(47)	35	(35)
GBP (+5% movement)	(29)	29	(22)	22
EURO (+5% movement)	21	(21)	16	(16)
31 March 2025				
USD (+5% movement)	16	(16)	12	(12)
GBP (+5% movement)	0.5	(0.5)	0.3	(0.3)
EURO (+5% movement)	(4)	4	(3)	3

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Interest rate risk exposure

The Company is not expose to any interest rate exposure on Borrowing as on 31 March 2026 and 31 March 2025.

Particulars	As at 31 March 2026	As at 31 March 2025
Financial assets		
Fixed rate instruments		
Bank deposits	68	61
Total	**68**	**61**
Financial liabilities		
Variable rate borrowings (including current maturities of long term debts)	5,882	1,444
Fixed rate borrowings (including current maturities of long term debts)	-	-
Total	5,882	1,444

(b) Sensitivity

Particulars	Profit and loss		Equity, net of tax	
	1% increase	1% decrease	1% increase	1% decrease
31 March 2026				
Variable rate borrowings	0.68	(0.68)	0.51	(0.51)
31 March 2025				
Variable rate borrowings	0.61	(0.61)	0.46	(0.46)

40 Capital management

The Company's policy is to maintain a stable and strong capital base structure with a focus on total equity so as to maintain investor, creditor and market confidence and to sustain future development and growth of the business. The Company monitors the return on capital as well as the level of dividends on its equity shares. The Company's objective when managing capital is to maintain an optimal structure so as to maximize shareholder value and safeguard its ability to continue as a going concern.

The Company monitors capital using a ratio of 'adjusted net debt' to 'equity'. For the purpose of Company's capital management, adjusted net debt is defined as aggregate on non-current borrowing, current borrowing, current maturities of long-term borrowings and lease liabilities less cash and cash equivalents and total equity includes issued capital and all other equity reserves.

The Company's adjusted net debt equity ratio were as follows:

Particulars	**As at**	
	31 March 2026	**31 March 2025**
Borrowings*	5,882	1,444
Lease liabilities*	496	560
Less: Cash and cash equivalents	(81)	(21)
Adjusted net debt	**6,297**	**1,983**
Total equity	3,198	2,727
Net debt to equity ratio	**1.97**	**0.73**

*Amount disclosed after considering non-current and current.

Dynamatic Manufacturing Limited

Notes to the financial statements for the year ended 31 March 2026
All amounts are in INR lakhs unless otherwise stated

41 Related party disclosures

(i) Name of related parties and description of relationship:

Description of relationship	Name of related party
Ultimate holding company	Dynamatic Technologies Limited
Fellow subsidiary	Dynamatic Limited, United Kingdom
Key executive management personnel	P S Ramesh - Director (Resigned effective from 13 November 2024)
	Chalapathi P - Director
	Ravichander V - Director
	Krishnaraj Rao - Manager (Effective from 6 February 2025)
	Mr. Kanthesh (Resigned on 6 February 2025)
	Shivaram V - Company Secretary (Effective from 2 July 2024)
	Upender Choubey - CFO (Effective from 13 November 2024)

(ii) Related party transactions during the current year and previous year as follow:

Nature of transactions	Name of Related Parties	For the year ended	
		31 March 2026	31 March 2025
Revenue from operations	Dynamatic Technologies Limited	930	2,460
	Dynamatic Limited, UK	2,672	12
Purchase of raw materials	Dynamatic Technologies Limited	1,010	163
	Dynamatic Limited, UK	521	-
Purchase of Intellectual Property right	Dynamatic Limited, UK	2,311	-
Reimbursement of Capital and Revenue expenses	Dynamatic Technologies Limited	9	53
Deemed capital contribution	Dynamatic Technologies Limited	129	50
Corporate guarantee received towards the Bank loan obtained	Dynamatic Technologies Limited	4,438	1,444

(iii) Balance receivable from and payable to related parties as at the balance sheet date:

Particulars	Related Parties	As at 31 March 2026	As at 31 March 2025
Trade receivable	Dynamatic Technologies Limited	-	323
	Dynamatic Limited, UK	1,371	12
Trade payable	Dynamatic Technologies Limited	1,049	-
	Dynamatic Limited, UK	509	-
Corporate Guarantee	Dynamatic Technologies Limited	5,882	1,444

Terms and conditions

All transactions with these related parties are priced at arm's length basis and resulting outstanding balances are to be settled in cash within six months to one year of reporting date. The balances receivable/payable are unsecured.

42 Profit/(Loss) per share

Particulars	For the year ended 31 March 2026	For the year ended 31 March 2025
Basic earnings per share in INR	1.13	(0.42)
Diluted earnings per share in INR	1.13	(0.42)
Profit attributable to the equity holders of the Company used in calculating basic earnings per share and diluted earnings per share	423	(157)
Number of weighted average outstanding shares used in computing earnings per share	3,75,00,000	3,75,00,000

43 Details of non-current investments purchased and sold during the year under section 186(4) of the Act:

Investment in equity instruments

Particulars	Face value per unit	As at 1 April 2025	Purchased during the year	Sold during the year	As at 31 March 2026
Unquoted					
Investments carried at fair value through profit and loss					
Kamachi Industries Limited	INR 10	33 (332,000)*	-	-	33 (332,000)*

Particulars	Face value per unit	As at 1 April 2024	Purchased during the year	Sold during the year	As at 31 March 2025
Unquoted					
Investments carried at fair value through profit and loss					
Kamachi Industries Limited	INR 10	33 (332,000)*	-	-	33 (332,000)*

*The amounts in parenthesis represents number of shares.

44 Details of loans given during the previous year under Section 186(4) of the Act

The Company has not granted any loans to any person or body corporate and hence no disclosure required under Sec 186(4) in the financial year 2025-26.

45 Income tax

A Amount recognised in statement of profit and loss

Particulars	For the year ended 31 March 2026	For the year ended 31 March 2025
Current income tax:		
Income tax	-	-
Deferred tax	-	-
Income tax expense reported in the statement of profit and loss	-	-

B Income tax recognised in other comprehensive income

Particulars	For the year ended 31 March 2026	For the year ended 31 March 2025
Other Comprehensive Income	-	-
Income tax charged to OCI	-	-

C The actual tax expense for the year ended 31 March 2026 is INR nil (year ended 31 March 2025 -INR Nil considering the unabsorbed tax losses and depreciation).

D Deferred tax

Deferred tax relates to the following:

Particulars	As at 1 April 2025	Recognised in profit or loss during 2025-26	Recognised in OCI during 2025-26	As at 31 March 2026
Property, plant and equipment and intangible assets	-	-	-	-
Provision for loss allowance	-	-	-	-
Provision for gratuity and compensated absences	-	-	-	-
Unabsorbed depreciation / loss	-	-	-	-
Deferred tax assets / (liabilities)	-	-	-	-

Particulars	As at 1 April 2024	Recognised in profit or loss during 2024-25	Recognised in OCI during 2024-25	As at 31 March 2025
Property, plant and equipment and	-	-	-	-
Provision for loss allowance	-	-	-	-
Provision for gratuity and compensated	-	-	-	-
Unabsorbed depreciation / loss	-	-	-	-
Deferred tax assets / (liabilities)	-	-	-	-

E Unrecognised deferred tax assets/ (liabilities)

Particulars	As at 31 March 2026	As at 31 March 2025
Difference between book value and tax base of Property, plant and equipment	(1,242)	(718)
Provision for loss allowance	610	610
Provision for gratuity and compensated absences	1,464	874
Unabsorbed depreciation and Business losses	6,997	9,346
Net unrecognized timing differences	7,829	10,112
Tax impact	1,970	2,545

No deferred tax adjustments were required in respect of amounts recognised in Other Comprehensive Income in view of the nature of items included therein and the availability of unabsorbed tax losses (including tax depreciation).

46 Revenue from contracts with customers

(i) Disaggregate revenue information

The table below presents disaggregated revenues from contracts with customers by the market or type of customers, timing of revenue recognition, contract-type and geography.

The Company believes that this disaggregation best depicts how the nature, amount, timing and uncertainty of our revenues and cash flows are affected by industry, market and other economic factors.

For the year ended 31 March 2026

Particulars	Aerospace	Hydraulics	Others	Grand Total
Market or type of customer				
Government	-	-	-	-
Non-government	9,435	2,655	-	12,090
Total	**9,435**	**2,655**	-	**12,090**
Timing of revenue recognition				
Goods or services transferred at point in time	9,435	2,655	-	12,090
Goods or Service transferred over time	-	-	-	-
Total	**9,435**	**2,655**	**-**	**12,090**

For the year ended 31 March 2025

Particulars	Aerospace	Hydraulics	Others	Grand Total
Market or type of customer				
Government	-	-	-	-
Non-government	6,558	-	-	6,558
Total	**6,558**	-	-	**6,558**
Timing of revenue recognition				
Goods or services transferred at point in time	6,558	-	-	6,558
Goods or Service transferred over time	-	-	-	-
Total	**6,558**	**-**	**-**	**6,558**

Reconciling the amount of revenue recognised under profit and loss:

Particulars	As at 31 March 2026	As at 31 March 2025
Revenue as per Contract	11,987	6,558
Revenue from contract with customers	**11,987**	**6,558**
Other Operating revenue		
Scrap sales	67	60
Export Incentive	36	16
Revenue from profit and loss statement	**12,090**	**6,634**

(ii) Contract balances

The Company does not have any contract balances.

(iii) Remaining performance obligations

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognised as the end of the reporting period and an explanation as to when the Company expects to recognise these amount in revenue. Unsatisfied or partially satisfied performance obligations are subject to variability due to several factors such as termination changes in contract scope, re-validation of estimates and economic factors.
Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation related disclosures for contracts where the revenue recognised corresponds directly with the value to the customer of the Company's performance completed to date, typically those contracts where invoicing is on time and material, unit price basis.

47 Reconciliation of liabilities from financing activities:

In March 2017, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) (Amendments) Rules, 2017, notifying amendments to Ind AS 7, 'Statement of Cash Flows'. These amendments are in accordance with the amendments made by International Accounting Standards Board (IASB) to IAS 7, 'Statement of Cash Flows'. The below disclosure is in line with such amendments suggested:

For the year ended 31 March 2026

	Particulars	1 April 2025	Cash flows	Non Cash Changes		31 March 2026
				Interest Expense	Foreign exchange movement	
i)	**Non- current borrowings - secured**					
	secured					
	- Term loan from banks*	178	1,988	-	-	**2,166**
	- Term loan from financial institution*	-	984	-	-	**984**
ii)	**Current borrowings - secured**					
	Cash credit and working capital demand loans	1,266	1,466	-	-	**2,732**
	Interest accrued but not due on borrowings	-	(359)	359	-	**-**
	Total liabilities from financing activities	**1,444**	**4,079**	**359**	**-**	**5,882**

For the year ended 31 March 2025

	Particulars	1 April 2024	Cash flows	Non Cash Changes		31 March 2025
				Interest Expense	Foreign exchange movement	
i)	**Non- current borrowings - secured**					
	Secured					
	- Term loan from banks*	-	178	-	-	178
ii)	**Current borrowings - secured**					
	Cash credit and working capital demand loans	-	1,266	-	-	1,266
	Interest accrued but not due on borrowings	-	(111)	111	-	-
	Total liabilities from financing activities	**-**	**1,333**	**111**	**-**	**1,444**

48 Additional regulatory information not disclosed elsewhere in the financial statements

(i) As per section 248 of the Companies Act, 2013, there are no balances outstanding or transactions with struck off companies.

(ii) The Company has not traded / invested in Crypto currency or virtual currency.

(iii) The Company has not advanced or loaned or invested funds to any other person(s) or entity(ies), including foreign entities (Intermediaries) with the understanding that the Intermediary shall:

a) Directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company (Ultimate Beneficiaries) or

b) provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries

(iv) The Company has not received any fund from any person(s) or entity(ies), including foreign entities (Funding Party) with the understanding (whether recorded in writing or otherwise) that the Company shall

a) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (Ultimate Beneficiaries) or

b) provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(v) The Company has no such transaction which is not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (such as, search or survey or any other relevant provisions of the Income Tax Act, 1961).
